

ASEA - UNINET
INTERNATIONAL COMMUNITY
OUTREACH PROGRAM

**STUNTING
PREVENTION
ACCELERATION**

FOR STUDENTS & ACADEMIC STAFFS

AUGUST - SEPTEMBER 2020

SUSTAINABLE DEVELOPMENT GOALS

Organised by:

AIRLANGGA GLOBAL ENGAGEMENT

**WELCOME TO
INDONESIA!**

You will be greeted by Universitas Airlangga and Diponegoro University, the two highly reputable public universities in Indonesia, with the first online community outreach program.

During the course of the program, the participants are encouraged to explore the background of the stunting problem in Surabaya and Semarang. Both academic staffs and students will have to undergo a working session with five different community representatives in Surabaya, as well as attending a series of webinar arranged by Diponegoro University. The participants are not only expected to gain experience in a diverse range of knowledge, but also to bridge and optimize the role of academia in stunting prevention. Interaction with the relevant communities and the assembly of experts on these fields are expected to prompt the emerging of new ideas and collaborations that can support and accelerate the effort to achieve said SDGs.

**ABOUT THE
PROGRAM**

The International Community Outreach Program under the ASEA-UNINET consortium is a 10-day online program designed to offer students and academic staffs an experience which allows them to explore and respond to actual social life issues circulating in the community, as well as providing possible solutions to these issues.

This program is initiated with Goal 1.3 and 3.2 of Sustainable Development Goals in mind. Those two goals, which focused on Poverty, Good Health and Well-Being aspects, are targeting the implementation of appropriate social protection systems on national scale and adequate measures for all. By 2030, substantial coverage of the poor and the vulnerable is expected to be achieved; and preventable deaths of new-borns and children under 5 years of age is expected to come to an end, with all countries aiming to reduce neonatal mortality rate to as low as 12 deaths per 1,000 live births, whilst mortality rate for children under 5 years is aimed to be as low as 25 deaths per 1,000 live births.

ACADEMIC CALENDAR

Application Deadline

31 JULY 2020

Admission Announcement

3 AUGUST 2020

Program Fee Payment Due

8 AUGUST 2020

ONLINE PLATFORM

Online platform announcement will be preceded by the admission announcement
